EXCEPTIONAL PROTECTION FOR DENTAL PRACTITIONERS

Gloves are a routine component of infection prevention and control in healthcare, providing a two-way barrier from bloodborne pathogens and other infectious materials.¹ Our gloves are uniquely designed to provide a secure and comfortable fit with high barrier integrity and better tactile sensitivity, so dental professionals can find the perfect glove for every task.

MICROFLEX® Soft White Nitrile TQ-601

White Nitrile Exam Gloves designed with skin moisturising HYDRASOFT™ Technology

- Soft nitrile formulation for a comfortable fit and feel
- Keep hands moisturised to prevent dryness due to excessive glove use and hand hygiene practices

HYDRASOFT™
Skin Moisturizing Technology

MICROFLEX® Ultraform® UF-524

NEW

Blue Nitrile Exam Gloves that offer affordable protection with an ergonomic design

- Designed with ERGOFORM™ Ergonomic Design Technology to support musculoskeletal health
- 300 gloves per box (XL size; 250 gloves per box) to reduce packaging waste

ERGOFORM™
Ergonomic Design Technology

MICROFLEX® MidKnight™ Touch 93-732

Black Nitrile Exam Gloves designed with ERGOFORM™ Technology to reduce muscle fatigue due to repetitive motions

- Thin yet strong for enhanced dexterity and tactility
- Black colour reduces glare
- Reduces visibility of blood potentially seen by patients

ERGOFORM™
Ergonomic Design Technology

MICRO-TOUCH® Nitrafree™

Pink Nitrile Gloves designed to minimise risk of Type IV chemical allergies

- 100% chemical accelerator-free to minimise chemical Type IV allergies and skin sensitivities
- Thin and lightweight to ensure excellent tactility while working

MICRO-TOUCH® Affinity™

Green Neoprene Gloves with superior dry and wet grip

- Textured fingers and latex-like fit and feel
- Excellent tear and puncture resistance

MICRO-TOUCH® Denta-Glove® NRL

Latex Gloves with high level of elasticity and fit

- Inner chlorinated surface to ensure fast and easy donning
- Manufacturing process reduces the latex protein content to minimise latex allergens

QUALITY SURGICAL PROTECTION FOR DENTAL PRACTITIONERS

Gloves play a critical role in essential infection prevention and control by providing a two-way barrier. Ansell sterile surgical gloves are designed with the latest technologies delivering exceptional protection, comfort, tactile sensitivity and superior durability to dental professionals.

GAMMEX® Latex

Latex formulation offering comfort, protection and sensitivity

- Enhances comfort and fit to help reduce hand fatigue
- Additional cleaning processes to minimise the risk of developing natural rubber latex allergies and sensitivities

- A.R.T™**
Pinhole Barrier Technology
- DERMASHIELD™**
Donning Aid Technology
- ERGOFORM™**
Ergonomic Design Technology
- SUREFIT™**
Cuff Roll-down Technology

GAMMEX® Latex Textured NEW

Latex formulation with a micro-textured finish for secure instrument handling

- Ideal thickness to optimise tactile sensitivity and protection
- Exceptional grip under dry and damp conditions

- A.R.T™**
Pinhole Barrier Technology
- DERMASHIELD™**
Donning Aid Technology
- ERGOFORM™**
Ergonomic Design Technology

GAMMEX® Non- Latex

Green non-latex, neoprene formulation for advanced allergy protection

- Non-latex and 100% chemical accelerator-free to eliminate the risk of latex Type I and minimise chemical Type IV allergies and skin sensitivities
- Optimal instrument handling and grip

- A.R.T™**
Pinhole Barrier Technology
- DERMASHIELD™**
Donning Aid Technology
- SUREFIT™**
Cuff Roll-down Technology

GAMMEX® PI Hybrid NEW

Polisoprene and neoprene blend delivers exceptional comfort and superior durability

- Non-latex to eliminate the risk of natural rubber latex associated Type I allergy
- Free from ZMBT, DPG and CPC chemical accelerators to minimise the risk of chemical Type IV allergies and sensitivities

- A.R.T™**
Pinhole Barrier Technology
- DERMASHIELD™**
Donning Aid Technology
- ERGOFORM™**
Ergonomic Design Technology
- HYBRID**
Synthetic Blend Technology

- SUREFIT™**
Cuff Roll-down Technology
