AQUACARE DRYAIR

WHY AQUACARE DRYAIR?

✔ Specifically designed for AquaCare

✔ Perfectly DryAir supply for a perfect work with Air-Abrasion and Polishing

✔ Reduce the risk of moister contamination from your air-line

DESCRIPTION

The DryAir removes any moisture contamination from the compressed air-line used to drive the AquaCare unit. An excellent dry air supply is essential for trouble-free operation of AquaCare units.

SPECIFICATIONS

Our compact DryAir air drying unit can be integrated into the stand and will ensure the quality of the air is suitable for air abrasion and air polishing powders.

The DryAir unit is also available as a stand-alone device where a stand is not required.

AQUACARE DENTAL AIR ABRASION CABINET

RELATED PRODUCTS

AquaCare Powder

AquaCare Handpieces

AquaCare Twin

WHY THE AQUACARE DENTAL AIR ABRASION CABINET?

✔ Perfect for extra-oral work
✔ Perfect for lab usage
✔ Ensure a 100% clean environment

DESCRIPTION

It offers a simple aid in support of your AquaCare unit to enable abrasion procedures to be done outside of the mouth.

Dental attachments such as crowns, bridges or brackets can be cleaned and abraded before they are cemented in the mouth.

SPECIFICATIONS

The cabinet is very efficient and easy to use. It has been designed to be small and mobile so that it can find a place in the smallest surgery without disturbing the arrangement of your workplace.

It is self-contained and requires no connection to a power supply – it uses a filter foam pad to catch the dust within the cabinet. The abrasive powder and debris retained in the filter can be removed as and when needed and the filter can be reused after cleaning.

Moreover, pieces like the Foam Filter, Side Entry Gloves or the Clear View Window can be replaced as needed when worn.

PRODUCT FEATURES

✔ User centred
✔ Easy to use and clean
✔ Light weight, easy to move around when required

AQUACARE HAND PIECES

WHY AQUACARE HAND PIECES?

✔ Light weight

✔ Precise control of spray

✔ Auto-clave

✔ Never clog

DESCRIPTION

The AquaCare's patented handpiece delivers a high-speed fluid stream, fed from the AquaSol, to create a liquid curtain around the abrasive medium.

The autoclavable handpiece comes in colour-coded nozzle sizes. The long-life tungsten carbide nozzles are easily changed to suit the treatment.

An entire procedure can be performed without removing the tip from the oral cavity. One handpiece supplies air, water and treating medium.

SPECIFICATIONS

Lightweight and fully autoclavable hp and sheaths available in 0.06mm Silver and 0.08mm Gold
