

PROTECTIVE COVERS & HYGIENE BAGS

THE IMPORTANCE OF MANUFACTURER APPROVED BARRIERS

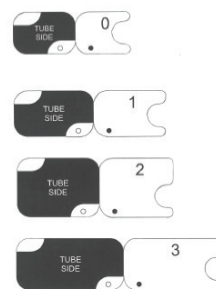

- Maximises service life of the imaging plates
- Does not compromise image quality
- Contains high quality material composition
- Ensures safe use of the system

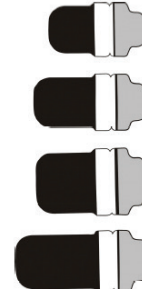

Thank you for your purchase and use of the KaVo manufactured PSP Unit. **The KaVo Protective Covers and KaVo Hygiene Bags are the manufacturer approved accessories.**

The KaVo Protective Covers and KaVo Hygiene Bags were created in order to **ensure the optimal clinical results, safe use of the system and long service life for the imaging plates.**

Protective covers

Hygiene bags

The imaging plate is protected with a bite resistant cover and a hygiene bag before x-ray exposure. The cover and hygiene bag are protecting the plate from:

- Ambient light
- Contamination
- Mechanical wearing
- Moisture

The manufacturers have perfectly coordinated their image plates and protective covers.

Always follow the manufacturer's instructions when ordering protective covers. This ensures that the highest quality levels are maintained for the diagnostic results, but it also **reduces material costs by extending the service life of the plates.**

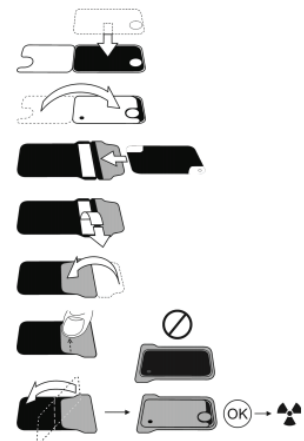

The manufacturer of this system will not be held responsible for any problems caused by using accessories from other manufacturers. **Proper use of original hygiene accessories guarantees the best image quality and maximum service life of the imaging plates.**
